## The Root producing hand watering Pellet

**Directions for use:** Insert one Aqua-Maxx Pellet with or without container into the PROportioner's clear jar and apply to 12,000 sq. ft. during hand watering and/or syringing once every month. Follow up throughout the month with Aqua-Aid or Aquifer Pellets as needed for localized dry spots and general garden and turf watering.

**The flow of water through the PROportioner or like applicator should follow the molded arrow on the PROportioner.**
