CONDUIT 90[®]

Long Term Soil Surfactant

Conduit 90 helps manage water repellency in soil conditions by providing deep penetrating functions, which allows water to probe deep into the soil profile.

Conduit 90 will provide rewetting of the soil profile for up to 120 days.

AQUA-AID[®] GUARANTEE

If you are not satisfied with **Conduit 90** for any reason after trying the product at recommended rates, AQUA-AID will refund your money.

Conduit 90 is easy to apply through standard spray application equipment to all turfgrass areas. **Conduit 90** mixes easily with water. **Conduit 90** should be sprayed before localized dry spot conditions and formations occur. **Conduit 90** is a 90 to 120 day surfactant.

Directions for Use

Conduit 90 should be applied at 16 ounces per 1000 square feet in 5 gallons of water. **Conduit 90** should be irrigated in after application to wash the surfactant off the leaf blades. Reapply **Conduit 90** after 90 days if climatic conditions still exist for formation of water repellency conditions.

Conduit 90 can be applied in two applications. Apply 8 ounces per 1000 square feet. Wait 10 to 14 days to reapply **Conduit 90** at 8 ounces per 1000 square feet. Under the two application process **Conduit 90** sprayed at 8 ounces per 1000 square feet can be applied in 2.5 gallons of water. **Conduit 90** should be irrigated in after application to wash the surfactant off the leaf surfaces.

Conduit 90 should not be tank mixed with fertilizers, pesticides or other products until proved safe under local weather and physical environment conditions.
