MICRO MULTI

Chelated Iron Package

Features

Micro Multi is a water soluble blend of metal nutrients chelated with humic acid. The unique combination of iron, copper, zinc, manganese and humic acid improve root growth, color and helps reduce plant stress. The nutrients are available to the plant through foliar or soil absorption.

Micro-Multi can be used on all ornamental turf grasses, woody and herbaceous ornamentals as well as landscape plantings and agricultural crops.

Benefits

Micro-Multi can be tank mixed with fungicides, herbicides, insecticides, liquid fertilizers and plant growth regulators.

It may also be tank mixed with plant growth stimulators such as Promote and Kelp-Pro.
