

Product Description

- **Turf Tabs** are a proprietary blend of polymeric surfactants, containing amino acids, and Mycorrhizae designed to increase water infiltration and while reducing turf stress caused by adverse environmental factors.
- One **Turf Tab** will cover approximately 18,000 to 24,000 square feet or turf. Severity of localized dry spot, water temperature, water pressure and application technique may cause coverage to vary.
- **Turf Tabs** are designed for use on golf courses, athletic fields, and general turf. For best results, a commercial hose end applicator is recommended.
- **Turf Tabs** will fit in all major commercial hose end applicators.

Guaranteed Analysis

PRINCIPAL FUNCTIONING AGENTS:

Blend of Polymeric surfactants 50%
Binders and de-foamers 40%

Also contains:

4% humic acid
2% amino acid
4% endo and etcomycorrhizae

NONPLANT FOOD INGREDIENT

DIRECTIONS FOR USE:

Use one tablet in hose end applicator for direct surface application. Apply to correct localized dry spots, or use to syringe greens and tees during extreme weather conditions.

Turf Tabs will not burn turf grass and does not need to be watered in. One treatment will last for three to four weeks depending upon local soil and weather conditions. Applications made on a more frequent schedule will not adversely effect soil conditions and turf grass.

Turf Tabs may be used as part of a comprehensive water management program.

PRECAUTIONARY STATEMENTS

Store in original container. Exposure to high heat and humidity for prolonged period of time may cause tablets to melt. When applying product wear appropriate personal protective gear. For people with sensitive skin, prolonged contact may cause skin irritation. Dispose of containers and unused product in accordance with local, state and federal regulations.
